

Industrial Water Corporate Subscription

Guiding Decisions in Industrial Water Investment

Industrial demand for water & wastewater solutions, from supply to discharge, is gaining momentum. Sparked by climate change, operational risk, and public pushback, industrial companies discharge over 130 billion gallons of water per day in the power, mining, energy, food & beverage, heavy manufacturing, and light manufacturing sectors, in the U.S. alone.

The importance of policy drivers, economic conditions, and empowered stakeholders has never been more critical. Bluefield supports companies and key decision makers seeking to capitalize on growing opportunities in industrial water, globally, with analysis of water management spend across key industry verticals.

Key questions addressed by this service

- How do water management strategies vary by industrial vertical?
- How do industries rank in terms of water intensity?
- Which business models are being deployed in industrial water?
- What is the size and outlook for industrial water management spend?
- How are environmental policy shifts influencing water strategies?
- How are corporate sustainability targets impacting opportunities for water solutions?

Rely on our water industry expertise to support your strategic decisions and gain a competitive edge.
