

Europe Municipal Water Market

Guiding Strategic Decisions Across Europe's Water Markets

Europe's water markets are at a crucial turning point. National policy drivers like the Green New Deal as well as specific country drivers such as the AMP8 regulatory cycle for European utilities will impact water market opportunities. Across Europe, individual countries are leveraging funding initiatives to invest in aging water systems while addressing water supply constraints, population growth, and environmental concerns.

Research Topics

Key Questions Addressed Through this Service

- What are the biggest factors disrupting the water sector in Europe?
 - Which policies will shape European utility strategies over the next few years?
 - How can emerging technologies and business models contribute to growth in the European water sector?
 - Where are the hotspots for municipal water reuse across Europe?
 - How are European countries balancing affordability against increasing investment needs at the city and utility system level?

Subscription Benefits
